Discontinuance of Exploitation of Railroad Articles.

25X1X6

As a result of conversation with [REDACTED] on March 11 last it has been determined that several articles listed in our memo of 3 September 1954 requesting exploitation would be of little value for the needs of this office. Hence it is requested that exploitation of these articles be discontinued. The articles in question all from the Jen-min T'ieh-tao are as follows:

- 1) The production and financial planning of the Harbin RR Shops. May 1951.
- 2) Business operations of RR traffic. April 1951.
- 3) Regulation of height of freight car couplers. April 1951.
- 4) Concerning the understanding (significance) of railway statistics. January 1952.
